PROJECT

Complaint and Suggestion Management System:

Description: Developed a web-based system that allows citizens to sign-up and log in to file complaints against different companies affiliated with the project. Implemented PHP to connect the database with HTML/CSS pages, enabling user authentication, login system, and logout system. Admins have access to review and manage complaints, as well as close them when issues are resolved. The project runs on a local server, and adding companies or hiring their admins requires manual database modification.
